Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15, 16, 21-43 rejected under 35 U.S.C. 102(b) as being anticipated by Wyman (US Patent No. 5,204,897).

Wyman discloses all the claimed limitations, particularly, a digital right management system (see the abstract) comprising:

A secure container and/or a secure environment; an application programming interface which provides interface between the secure container/environment and a third party software (see column 10, lines 30-58); the secure container or environment processes a request coming from a third party software through the application program interface (column 11, lines 3-30);

The secure container or environment validates signatures of one or more documents to verify that the one or more documents are compatible with the secure container (column 11, line 31 to column 12, line 59);

In the case of compatibility or incompatibility, files or other dynamically linked libraries may or may not be loaded. Applicant is directed to columns 12-14.

The system of Wyman also comprises various rendering engines, communication ports, storages, file systems, structured documents, encryption engines, interface modules with menus and submenus. Applicant is directed to figures 1, 6 and 7 of Wyman.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wyman (US Patent No. 5,204,897).

The teachings of Wyman are discussed above. Wyman does not explicitly state the rendering engine is connected to a handheld device or to a wireless device. Wyman teaches connecting a rendering engines to various types of output devices. Connecting to a handheld device or to a wireless device would have been obvious to one of ordinary skill in the art to do in order to provide users with alternate means of requesting and or obtaining documents so as to accommodate most types of clients.
